

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

The City of Castroville Texas has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During June 1 – September 30, 2016 we did not complete all monitoring for Lead and Copper and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for Lead and Copper, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
Lead	Annual	10	June 1 - Sept. 30	Nov 7 - Nov 11
Copper	Annual	10	June 1 - Sept. 30	Nov 7 - Nov 11

What is being done?

We are working to correct the problem. For more information please contact Lawrence Heinrich at 830-931-4090 or 1209 Fiorella, Castroville TX 78009.

Samples have been taken and submitted to a certified laboratory and results will be submitted to the TCEQ when received from the laboratory.

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
